

# YOU'RE INVITED

## Support Teaching & Learning from Anywhere

Monday, May 3 - Thursday, May 6 | 10a.m. & 12p.m. CT

**RSVP NOW**

School district IT staff are faced with increased pressures of doing more with limited time and resources, and this year has increased that pressure significantly with additional obstacles of location and safety measures. Whether you're in an in-person, remote or hybrid setting, Intune and Autopilot can help you deploy and manage your devices quickly, efficiently, and securely. Microsoft's robust security suite works together to maintain unparalleled identity, data, and endpoint protection.

Educators and leaders are challenged with staying connected in distance learning settings. Explore tools to engage your students no matter where you are and maintain peer collaboration while remote and even after return to in-person learning.

### AGENDA:

#### Audience

**10a.m.-11a.m. CST sessions – EDU IT Pros**

**12p.m.-1p.m. CST sessions – All EDU Roles (Leadership, IT Pros, Instructional, ED Tech & more)**
