# College & Career

Teachable, transferable skills that positively impact behavior, academic achievement, graduation rates, and post-school outcomes

What is CCC?

The College and Career Competency (CCC) Framework supports educators in systematically embedding intrapersonal, and cognitive competencies into course content.

Why It Matters:

Through free research-based instructional resources, professional development, student assessment, and implementation roadmap tools, staff can systematically teach competencies and academic learning standards and support students to develop into career-equipped, lifelong learners who are socially and emotionally engaged.
