

School Improvement Services at a Distance

QUALITY SUPPORT ANYTIME, ANYWHERE

Greenbush's School Improvement Services (SIS) is a consortium of nearly 150 school districts and private schools covering much of eastern Kansas and beyond. Our SIS staff who support these districts have served as administrators and instructional leaders and understand the various components that help school systems like yours operate. We strive to provide technical assistance and professional learning opportunities to district and building leaders, as well as teachers and support staff.

These School Improvement Services at a Distance options are intended for districts who want the same quality supports for curriculum, instruction, assessment, and accreditation, but are unable to easily travel to our two main facilities. SIS at a Distance districts receive year-round support in these areas, and is a great option for districts who want access to our many programs and services, but who may not be able to take advantage of as many in-person events.
