

TECHNOLOGY SUPPORT SERVICES

REMOTE NETWORK SERVICES

Our network services provide comprehensive management and support for your district's network infrastructure. Our team will monitor, maintain and optimize your network to ensure it runs efficiently and effectively. Our team will remotely monitor your network to detect and resolve issues before they impact your school day.

REMOTE MANAGED IT SERVICES

Our managed IT device services provide comprehensive support and management of your organization's IT devices, including desktops, laptops, servers, and mobile devices. We configure data backup and recovery services to ensure that your district's data is protected and recoverable in the event of a disaster or data loss.

TECHNOLOGY AUDITS

Our Cybersecurity Audit provides a comprehensive evaluation of security controls to ensure compliance, enhance resilience, and mitigate risks. We conduct external vulnerability assessment scans to identify and remediate weaknesses in networks, web applications, and public-facing infrastructure. Our audit also reviews incident response and security readiness, assessing detection, mitigation, and recovery processes to strengthen cyber threat preparedness. Additionally, we evaluate Identity and Access Management (IAM) policies, procedures, and controls to ensure robust authentication, authorization, and access management. Aligned with the Cybersecurity Framework and ITEC 7230a, this audit enhances security posture and safeguards critical assets against evolving threats.

STAND ALONE PROJECTS & CONSULTING

We offer comprehensive turn-key solutions to upgrade and modernize technology infrastructure, ensuring seamless implementation and optimal performance. Our services include complete server refresh projects to enhance reliability and efficiency, as well as network upgrades featuring the replacement of switches and access points for improved connectivity. From planning to deployment, we manage every aspect of the project, providing a streamlined and hassle-free experience that meets the evolving needs of your organization.

Prices by District Size:

	Network Services	Managed IT Services
Under 200 students	\$1000	\$3300
200-600 students	\$1000	\$4300
600-1000 students	\$2000	\$5300
Over 1000 students	\$3000	\$5700

Network Services discounted if subscribe to both services.

On-site days are additional \$650 a day, plus mileage.

Yearly maintenance prices (first year setup and configuration) may require additional fees.
