Star Party

March 21

Greenbush Campus
947 W 47 Hwy, Girard, KS

7:30 p.m. - Activity & Snacks

8 p.m. - Presentation

Moon walkers: Then and Now

Speaker: Amie Beggs, Greenbush student enrichment

On Dec. 19, 1972, Apollo 17 splashed down in the Pacific Ocean, officially marking the end of the era of crewed lunar missions.

For over 50 years, the Moon has remained unvisited by humankind. Until now!

Join us as we look back on the history of people on the Moon and uncover what lies ahead with Artemis II, the next crewed mission to the Moon!

**DARK SKIES • PORTABLE DOME PROGRAM
SKY TOUR • HANDS-ON SMART TELESCOPES**
